AI Consultant at Actainable, a Langdock Partner, helping mid-sized companies take AI from the first workshop to a working solution. Master's student in Management (University of Mannheim) with 4+ years at SAP across AI product showcases, executive strategy and flagship events. Hands-on with LLMs and AI agents.

EXPERIENCE

Actainable — Mannheim
AI Consultant — October 2026 – present

- Guide mid-sized companies from first workshop to working solution: AI use cases, roadmaps, process analysis
- Work embedded with client teams, building prototypes and AI agents right where the work happens
- Enable client teams to build their own AI agents on Langdock (Actainable is a Langdock Partner)

SAP — Walldorf
Working Student | SAP Experience Services — April 2025 – October 2026

- Built customer-ready product showcases for SAP Joule (AI), translating strategy into compelling enterprise demos
- Led onsite Experience Center delivery at SAP NOW Berlin 2025 (~1,000 attendees): drove 400+ visitor engagements and generated 8 qualified leads
- Executed Experience Center operations at SAP Sapphire Madrid (5,000+ attendees) and SAP Select Las Vegas (3,000+)

Working Student | Board Office Technology & Innovation (CTO) — September 2023 – February 2024

- Coordinated CTO Executive Board Office operations including scheduling, stakeholder alignment and meeting follow-ups
- Prepared executive-ready briefings, agendas and decision materials for strategic topics and customer meetings

Working Student | Customer Advisory — January 2023 – August 2023

- Presented sustainability product demos (Sustainability Control Tower, Sustainability Footprint Management) including EU taxonomy topics
- Automated monthly leadership reporting by syncing shared Teams calendar data into Excel via Power Automate, saving several hours of manual work per month

Internship & Working Student | Office of the CTO Germany — February 2022 – December 2022

- Led workstreams for an award-winning internal training series (MEE Region Innovation Award), streamed live to 200+ sales colleagues with hundreds more viewing recordings
- Orchestrated onsite customer engagements including board-level meetings; produced leadership communication in the green-screen studio and presented a first customer showcase at Greentech Festival (Berlin)

PROJECTS

Sommer OS | Personal AI agent system — September 2026 – present

- Self-hosted assistant, dashboard, long-term memory and background agents for study, work and private life; versioned releases, encrypted backups, 800+ automated tests
- Privacy and control by design: separated areas with their own storage, agents and keys, zero-data-retention model routing; agents only draft, nothing is sent without approval

Bachelor Thesis | Validating stylistic similarity in author-fine-tuned LLMs — 2025

- Fine-tuned LLaMA-3.2-1B with LoRA/PEFT on Dickens and Twain corpora (Hugging Face, CUDA, Slurm GPU cluster) and evaluated which stylometric metrics capture an author's voice

Web builds | Brand and e-commerce sites, designed, built and deployed end-to-end (e.g. touchcard.eu)
